

# Projects

All projects are public on  
[https://github.com/ASU-CompMethodsPhysics-  
PHY494](https://github.com/ASU-CompMethodsPhysics-PHY494)

# Abstract

- 1 abstract per team
- include title, authors, text
- maximum 200 words
- use the template in poster/abstract.txt
- due: 5/1/2017 11:59pm (submit through repository)

# Abstract

- What was the **problem to be solved**?  
Background and **why is it interesting**? What are the major hurdles? What was **your goal**?
- **How** did you approach the problem, what **methods** did you use (keep high level, don't list code or function names)?
- **What** are the **results** and what do they **mean**?  
Was the goal achieved?
- Conclusions/future work (1 sentence)

# Abstract

- How to get the code?

“Code is available at <GitHub URL>”

- *Optional:* License your code (see <http://choosealicense.com/>):

“under the <LICENSE>.”

# Contributions

- submit a file poster/contributions.pdf detailing who did what (plain text file is also ok)
- use GitHub usernames instead of real names
- submit together with the poster

# Poster PDF

- submit a PDF of your poster through your GitHub repository as `poster/poster.pdf`
- due: **5/3/2017 11:59pm**
- either 1 page PDF (full poster) or multi-page (if poster will be assembled from pages)

# Poster Session

- 5/4/2017
- PSH 355
- 12:10pm – 3:15pm

- all team members must attend
- individual Q&A at board (<10min) will constitute the individual component of your grade
- Ian and David will also do Q&A but their comments to me about you can only *improve* your grade.

# Poster

- poster boards: 30 x 40 in
- portrait or landscape
- print poster (expensive) or assemble from individual pages
- mounting material (boards, tape, ...) will be provided

# Poster: Required

- title
- names of authors
- repository URL
- Acknowledgements section (*if* help from outside of team)

# Poster: Recommended

## 1. Background (WHY?)

problem, equations to be solved, motivation

## 2. Methods (HOW?)

**algorithms**, parameters, code snippets, flow diagrams, object diagrams, libraries used, ...

## 3. Results (WHAT?)

focus on **graphs, images and tables**: show data (only little text to annotate data)

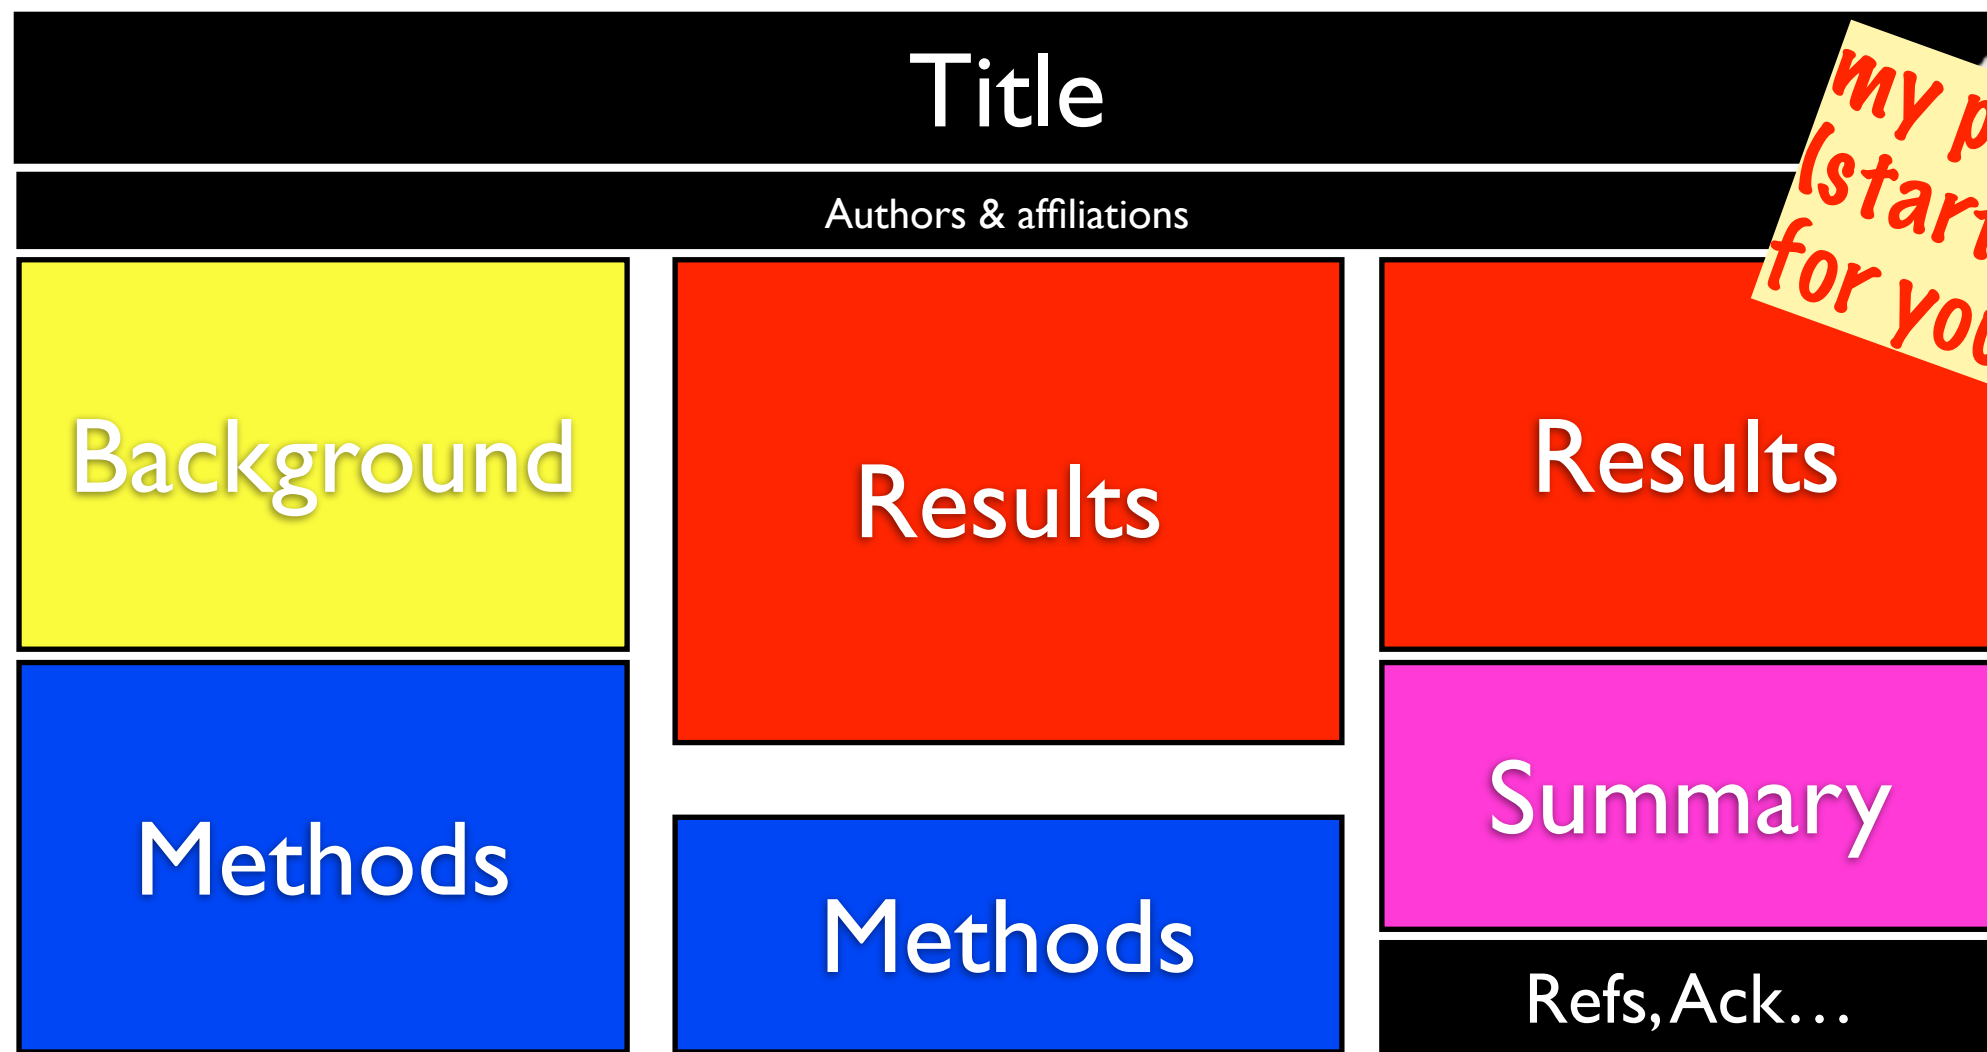

# Poster: Recommended

## 4. Conclusions or Summary

~1 paragraph text summary + future work

## 5. References (if any)

Small print section... paper references, URLs, ...

- tell a **story** (beginning, middle, end)
- poster + **you** = poster presentation  
(does not have to make sense without you)
- add what you need **illustrate** your story

# Typography

*my preferences  
(starting point  
for you)*

- sans serif fonts (Helvetica, Gill Sans, Optima, Arial, ...)

- font sizes

title	64 pt
-------	-------

authors	42 pt
---------	-------

headings	40 pt
----------	-------

text	30 pt
------	-------

references, acknowledgements	15 pt
------------------------------	-------

# Tools

- full size poster (vector graphics tools): Inkscape, Adobe Illustrator
- individual pages posters: whatever you use to make presentations (LaTeX, Powerpoint, OpenOffice, Keynote, ...)
